The best
for the best performance

As Millpart, we are striving for new products and the next big innovation. "Diversity" means more than just a word to us: it reveals who we are. With every work we do, we are trying to make technology more practical, helpful and valuable for our customers.

Aiming to be one of the world leaders particularly in the production of elevator buckets, Millpart Elevator Buckets was established with a vision aware that the way to sustainable growth in the Turkish machinery and food industry is investment. Our company is constantly converting its income to investment with the moves reasonable according to the industrial and technological developments in its field. Started to be known as one of the leading brands in Turkey, offers the best service to our customers as a high-quality, fast and reliable company in the industry.

Since the first day it was founded, Millpart has been raising the bar on manufacturing high quality products and keeping its prestigious name in the top list.

Excellent Performance

In the Most Challenging Conditions

Eco Prime.

PE Polymer - Impact Resistant Polyethylene

Eco Prime.

PE - Impact Resistant Polyethylene

■ Unbreakable Strong Structure

Raw material reinforced against the strongest impacts and high performance.

■ Economic and Healthful

Eco Prime elevator buckets are being produced from food-grade engineering plastic.

■ Ready for Challenging Conditions

It is ready for changeable weather conditions and all impacts that may occur during transportation.

New Generation **ECONOMIC** Elevator Bucket

everything starts with
IMAGINATION

Eco Prime.

PE Polymer - Impact Resistant Polyethylene

Always maximum resistance against hard and sudden impacts at high speeds. Thanks to its unbreakable structure, it extends your replacement times and reduces your maintenance costs. Eco Prime buckets create less friction coefficient thanks to friction channels and assist engines by reducing energy loss.

MAXIMUM PROTECTION *Against Strongest Impacts*

- Hardness
- Medium Frictional Resistance
- Nonbending
- Flame Retardant
- Antistatic
- Weather Resistant

New Generation Economic Elevator Bucket

Our Eco Prime buckets, which are produced particularly against breaking, are an economic engineering plastic product enriched with special additives against impacts.

HDPE - High Density Polyethylene

Premium.

HDPE - High Density Polyethylene

Impact Resistance

Unbreakable structure reinforced at maximum level against part impacts that may occur in high speed elevators.

Abrasion Resistance

Thanks to its high friction resistance under favour of its hardened structure and slippery surface, it is more resistant to abrasion.

Tensile strength

Although hardened against abrasion, it also provides high tensile strength thanks to its 70% form elasticity.

Always
HIGH
Performance

Premium.

HDPE - High Density Polyethylene

High Density Polyethylene and hardening additives are produced with injection technology with low speed shaft, providing maximum compression and density. In this way, it creates a more durable chain against mouth melts caused by friction. It brings together contrasting properties such as hardness and flexibility during the production phase.

PA NYLON - High Hardness Impact
Resistant Engineering Plastic

Exclusive.

PA NYLON - High Hardness
Impact Resistant Engineering Plastic

■ Against the Strongest Impacts

Exclusive elevator buckets are developed for maximum resistance to breaking. It can absorb all high speed impacts and eliminates the breaking.

■ High Performance in All Products

Exclusive elevator buckets are produced for high performance and durability in **Feed, Wheat, Corn, Barley, Pasta** and others.

■ Greater Volume, Less Waste

The elevator buckets produced by Millpart are durable and designed paying regard to high benefit and efficiency. We are always trying to find new ways to make stronger products that can be less harmful to the environment and nature with materials made of quality engineering plastics.

High
Performance in
All Products

everything starts with
IMAGINATION

Exclusive.

PA NYLON - High Hardness
Impact Resistant Engineering Plastic

Exclusive Elevator Buckets are being produced from special engineering plastics with high impact resistance and high friction coefficient. Exclusive buckets are being produced completely with engineering plastics for high performance. Exclusive Buckets, which show maximum performance particularly about friction-induced mouth melting, can also achieve the best results with their curved corners, lubricant channels and unique design.

MAXIMUM ENDURANCE LOW MAINTENANCE COST

Less Maintenance, **More Transport** ■

You will notice the changes in energy, labor and time costs, also the costs which arise from the reduction of capacity, fast wearing belts that caused by frequent changes of elevator buckets due to mouth melting and breakage.

More Durable Than Metal, **But Lighter** ■

Exclusive Elevator Buckets are more durable and longer lasting than elevator buckets made of pressed sheet metal. You can achieve energy savings and high capacity increase up to 80% with lightweight Exclusive Buckets.

NO MORE capacity decreases due to mouth melts

Our Polyamide - Nylon Exclusive Buckets are produced against friction-induced melting with engineering plastics with high friction coefficient reinforced with special additives.

MC-06	M10 x 50

Millbelt.

Ep Fabric Cord - Elevator Belts

Flat belts produced with a special technique and on which elevator buckets are attached are called elevator belts. These belts are produced with a different system than conveyor belts. EP Cord Fabrics are calculated according to the tensile strength of the Elevator Belt and EP Cord Fabrics varies when the tensile strength increases. In addition, we provide Elevator Belts in international standards such as Oil Resistant, Heat Resistant, Antistatic Closed Edge according to their usage areas.

- Bucket can be sent drilled in accordance to mounting dimensions.
- It can be produced in any size you want ranging from 100 mm width to 1400 mm width.
